Kewin Benet M

2nd Year B.Tech CSE | PES University, Bengaluru

github.com/MKB007007 | linkedin.com/in/kewinbenetm | Portfolio

Profile

Second-year CSE student at PES University with hands-on experience in Python, Java, and C. Placed 2nd at an Ather Energy-sponsored overnight IoT hackathon and won 1st at the SustainX Studyathon. Independently built a GitHub REST API analytics tool demonstrating initiative beyond coursework. Eager to contribute to TILDE's technical community and collaborative coding culture.

Education

PES University **2025 – Present**
B.Tech, Computer Science & Engineering *Bengaluru*

St Vincent Pallotti School **Graduated 2025**
Class 1 to 12 · ICSE Board

- Java as primary programming language

Achievements

2nd Place — Ignition 1.0 IoT Hackathon **November 2025**
Powered by Ather Energy · 59 teams, 230+ participants · INR 35,000 prize pool *PES University EC Campus*

- Designed a wearable rider telemetry system capturing real-time motion and GPS data with live app streaming, riding-state detection, and end-to-end logging.
- System was mounted on helmets and riding gear for live evaluation on a preset track, judged on accuracy, GPS stability, and transition detection.

1st Place — SustainX Studyathon **April 2026**
PES University

- Drafted and presented a research paper on a given sustainability/tech topic, winning 1st place among competing teams.

Projects

GitHub Repository Intelligence Analyzer **Python · GitHub REST API**
github.com/MKB007007/Repo-intelligence

- Built a CLI tool that queries the GitHub REST API to analyze contributor concentration and project health metrics for any public repository.
- Implemented custom pagination handling to fetch complete contributor datasets beyond GitHub's default 30-result API limit.
- Computes engineering metrics including Top Contributor Share and Top-5 Contributor Share to quantify bus-factor risk in open-source projects.
- Designed a roadmap for activity trend analysis, issue health scoring, and automated insight generation as future extensions.

Technical Skills

Languages	Python · Java · C
Tools	GitHub REST API · Git
Concepts	REST APIs · Pagination · Data Analysis · Web Development

Relevant Coursework

Data Structures & Algorithms · Programming in Python · C Programming · Object-Oriented Programming (Java) · Computer Organization · Mathematics for Computing
